To Whom It May Concern:

Please allow this letter to serve as my professional recommendation and acclamation for the Brainware Safari Software. During the 2005-2006 school year we allowed students, with records of poor discipline and misbehavior, from our Indianapolis Public Schools' Boys Academy to work with the Brainware Safari Software. According to the teachers, the results were simply amazing.

Teachers shared some of the following observations about the boys using the Brainware Safari Software: they had an increased confidence; they increased their reflectiveness; they had increased motivation; they practiced on the software and increased their skills; they became better problem solvers; they displayed increased auditory skills; they demonstrated teamwork and support for each other; active participation and critical thinking. The teachers' views were validated by the boys' performance on the Woodcock Johnson Test. The pre-test scores and the post-test scores illustrated tremendous improvement and value added. The Principal of the Academy, Stan Law, stated that it was unbelievable that the students could progress so much in so little time.

I commend Mr. Roger Stark for sharing an educational tool that truly lived up to the promises he made. The Brainware Safari Software had a tremendously positive impact on our boys and enabled them to demonstrate high measurable achievement through enhanced cognitive skills, visual awareness, auditory skills, thinking skills, and memory enhancement. I urge you to give this software your highest consideration.

Sincerely,

A handwritten signature in cursive script that reads "Eugene G. White".
